

## History

### Unit of Learning: Great fires of London and Gateshead

In History we have been learning about the Great Fire of London. We used the skill of chronology to sequence the events of the fire, as well as the skill of enquiry to find out more from Samuel Pepys diary.

We were amazed to find out that there was another great Fire, right here in the North East. We found out that the Great Fire of Gateshead started in a woollen mill and lasted 1 and a half days, shockingly, it killed 53 people.

When looking at the impact the Great Fire of London had on the future we made fire engines in DT with a moving mechanism!

At home, we worked with our families to make a Tudor house to replicate the buildings that would have been affected by the fire.
